Airline Management System | Java Project | Without Drag and Drop | NetBeans & MySQL

AIRLINE MANAGEMENT SYSTEM JAVA Core Project This project on Airline Management System is the automation of registration process of airline system. The system is able to provide much information like passenger's information, criminal's, list of all passengers etc. The system also allows us to add records when a passenger reserves a ticket. For data storage and retrieval we use MySQL Database. It enables us to add any number of records in our database. Language Used - Core Java Concept Used - Swing IDE Used - NetBeans Database Used - MySQL It is made with PROPER CODING and NO DRAG AND DROP If you have any problem or you have any Query, do comment in the comment section or ping me on Instagram: username - codeforinterview
