Kia Spectra Transmission Codes - Tips and Tricks for Failed Wire Harness

My 2008 Kia Spectra decided to have all sorts of transmission shifting issues: clunks, not down shifting, not upshifting, and all-around being not-fun to drive. ProProjects on YouTube has a great video detailing the removal of the transmission pan, valve body, and the wire harness. This video is some additional tips and explanation on my experience. I had P0700, P0711, and P0743...but the same wire harness can cause all sorts of transmission codes depending on which solder joint cracks first.
