#### EQAO Grade 3 Questions Sorted by Strand - Google Slides

Adapted from www.eqao.com in preparation for grade 3 testing. Keewatin Patricia District School Board, January 2013. This resource is intended for classroom use and as practice for your students. Each strand has questions from the 5 years of EQAO tests (2012, 2011, 2010, 2009, and 2008) in the order that they occur in the assessment.

#### Dr. Janette M. Hughes - Assessing Reading

A Guide to Effective Instruction in Reading, Kindergarten to Grade 3, 2003, p.12.27. The running record, developed by Marie Clay, is a reliable assessment tool used by teachers to systematically record observations of a student's oral reading using a set of standard conventions or notations.

#### Grade 3, Primary Division - EQAO

The Assessment of Reading, Writing and Mathematics, Primary Division (Grades 1–3) tests the reading, writing and math skills students are expected to have learned by the end of Grade 3. The administration window of the Assessment of Reading, Writing and Mathematics, Primary Division (Grades 1–3) is scheduled to take place from Wednesday, May 4, to Friday, June 24, 2022.

### Place Value Song For Kids | Ones, Tens, & Hundreds | 1st - 3rd Grade

Thank you for watching our Place Value Song. If you liked the video, you'll LOVE our other fun activities that go along with the video at [learnmore.numberock.com/pvyt/](http://learnmore.numberock.com/pvyt/). Q. Why is it important that students learn about Place Value? A. Learning about Place Value helps us understanding the meaning of each digit in a multi-digit number. Being able to bundle up 10 ones, because of the luxury of a tens place, allows us to express numbers like 10 and above efficiently without having to create a new digit for each number. Simply stated, place value helps us make sense of increasingly large (and small) numbers while saving time and energy communicating these values to one another. Can you imagine having to use 100 different symbols to express values from one to one-hundred? Can you imagine not having an easy way of telling of somebody just gave you \$500 or \$5,000? Without the current base-10 place value system, our modern lives would be most confusing to say the least! Q. What grade levels does this video target? A. Kindergarten, 1st, 2nd & 3rd Grade | KS1 Q. Where did you guys come from? A. Numberock is a project that I, Mr. Hehn, began as a 5th Grade math teacher of 7 years. It came together after years of experimenting with my lessons trying to figure out the best way to help my students retain the math concepts they were learning. Q. Does Numberock drive real results in the classroom? A. I knew I found the secret sauce when not only were my students retaining the concepts longer, they were singing the songs outside of the classroom during recess and at home with their parents during dinnertime. The songs were so catchy, my students couldn't get the math songs out of their head! During testing, I often found my students humming the melodies in order to jostle their memory of a rule or problem solving process. As we've all experienced, there is something about the power of music that allows us to retain information easier and for longer periods of time. Without getting into the finer details of multi-sensory learning and how it often helps the students who most need the help, the power of a catchy song is hard to deny. Q. I love your songs. Where can I experience more of what NUMBEROCK has to offer? We have a fun variety of Place Value Song-themed teaching resources. Learn more at [learnmore.numberock.com/pvyt/](http://learnmore.numberock.com/pvyt/). For the low price of \$4.95/month, premium members gain access to video-aligned activities like worksheets, printable posters/anchor charts, task cards, self-graded assessments, games, digital activities, as well as our very unique video-aligned note taking activities called NUMBER NOTES. Sign-up through the link above to get a month for free. Learning Standards Alignment: Common Core: 1.NBT.B.2 | 1.NBT.2 Understand that the two digits of a two-digit number represent amounts of tens and ones. Understand the following as special cases: 2.NBT.A.1 | 2.NBT.1 Understand that the three digits of a three-digit number represent amounts of hundreds, tens, and ones; e.g., 706 equals 7 hundreds, 0 tens, and 6 ones. Understand the following as special cases... 4.NBT.A.1 | 4.NBT.1 Recognize that in a multi-digit whole number, a digit in one place represents ten times what it represents in the place to its right. For example, recognize that  $700 \div 70 = 10$  by applying concepts of place value and division. TEKS | Texas: 1.2E Use place value to compare whole numbers up to 120 using comparative language. 2.2A The student is expected to use concrete and pictorial models to compose and decompose numbers up to 1,200 in more than one way as a sum of so many thousands, hundreds, tens, and ones. 3.2B The student is expected to describe the mathematical relationships found in the base-10 place value system through the hundred thousands place.

### Let's teach for mastery -- not test scores | Sal Khan

Would you choose to build a house on top of an unfinished foundation? Of course not. Why, then, do we rush students through education when they haven't always grasped the basics? Yes, it's complicated, but educator Sal Khan shares his plan to turn struggling students into scholars by helping them master concepts at their own pace. TEDTalks is a daily video podcast of the best talks and performances from the TED Conference, where the world's leading thinkers and doers give the talk of their lives in 18 minutes (or less). Look for talks on Technology, Entertainment and Design -- plus science, business, global issues, the arts and much more. #### The Carbon Cycle Process

What is the Carbon cycle? The carbon cycle is one of several biogeochemical cycles found on Earth. Carbon is found in almost all living organisms and makes up around .04 percent of our atmosphere. What are the steps of the carbon cycle and how does the Carbon cycle work? Carbon may travel several paths including, The atmosphere, the terrestrial biosphere, the earth's interior which includes the lithosphere, the ocean, and human influence like burning fossil fuels and other objects that store carbon. In the video, I go through a carbon cycle diagram and explain each step. Carbon can be found in several forms including carbon dioxide and methane. The carbon cycle is essential for many ecosystems on Earth.
