9 Lines of Code Every CNC Machinist Needs To Know! - Haas Automation Tip of the Day

9 Lines of code are all you need to get started. But they're also what you need to really understand, if you're planning on being a knowledgeable CNC programmer. In this Tip of the Day, Mark shows us where to START and where to go after we've got those first 9 lines under our belts. You can find all of Mark's bonus content for the video here: haascnc.com/video/Video-Bonus-Content.html Mark mentions other videos that are related to the material in this video. Here are the links to those videos: Set Work Offsets Manually: youtu.be/AyMsFtwzrmI Set Work Offsets with Probe: youtu.be/5I1eG49XnTA Set Tool and Work Z Offsets: youtu.be/uNjMIIRttFE Set Tool Offsets with Probe: youtu.be/J7dCwBkUNNU?list=PL1FfK7Yod27cy-MlhXsKkDwTmvlcf7ps7 Complete Part Setup: youtu.be/gbcMm-rSXZY Don't miss any TIP-OF-THE-DAY videos. Haas Control Training Video

Overview of Haas NGC Mill Control

Haas NGC Control - Basic Function - Step by Step Guide

Today we cover the basic functions that every new user needs to know about the Haas Next Generation Control

Haas CNC Mill Startup and Keyboard Overview

Set Work Offsets in Seconds – Haas Automation Tip of the Day

Anyone who has run a machine knows how long it takes to set work offsets. What if you could do it in a fraction of the time? It turns out you can, and it's easier than you think! Watch as Mark walks you through the process of setting your work offsets using a probe and learn a few other probing tips along the way. Don't miss any TIP-OF-THE-DAY videos. Setting Work and Tool Offsets on the Haas CNC Mill - Clark Magnet High School SSP.

Lesson topics include jogging in X, Y, and Z axes using various jog increments, setting X and Y axis work offsets using an edfinder, and setting tool length offsets by referencing tools to the top of the workpiece. This instructional video was developed by Clark Magnet High School in Glendale, California as part of the Specialized Secondary Program funded by the California Department of Education, and is made available for other schools to use in their instructional programs.

How to Use a CNC Machine: Getting Started with the Haas VF-2

How to set up a tool, set up your work coordinates and how to start a program. This is a long overdue video originally recorded in 2015, These are all the basics that I wish I had known when moving from a simple Bridgeport conversion CNC to a real-deal Haas machining center. This footage was shot a while ago, but I think the information is still relevant. The video will also be embedded on my blog at neverstopbuilding.com/how-to-use-a-cnc-machine-vf2 and on that page I'll expand on additional information should questions arise. Please consider supporting us on Patreon: patreon.com/neverstopbuilding - 0:27 - Things you will need + safety - 2:10 - Turning on the power - 3:00 - Overview of the control panel - 3:30 - Starting up the machine and clearing alarms - 4:25 - Reset and homing the machine - 6:53 - Setup of the work coordinate system - 9:10 - How to Jog the head around and tool change - 11:24 - Program to turn the spindle on for edge finding - 13:43 - Entering a work offset after edge finding - 14:55 - Measuring the tool offset - 16:03 - Future me comments on a better way to set the z offset - 17:19 - Discussion of method to use gauge block to set tool offset - 18:40 - Using a tool height dial indicator to set tool offset - 24:00 - Finding the Z offset with a height gauge - 27:13 - Loading a program from disk - 30:00 - Cycle Start (money shot)
